Hicham El Banine

has successfully completed the online Specialization

Photography Basics and Beyond: From Smartphone to DSLR

As a Learner in Photography Basics and Beyond: From Smartphone to DSLR, you studied the foundational principles of photographic technique, digital imaging from camera exposure to print, and the organization of pictures according to the principles of Design into successful compositions. You further developed a personally significant Capstone Project, applying the skills and knowledge gained through participation in each of these five Courses and your own unique approach to form and content. In addition, you learned the meanings and uses of the specialized vocabulary in standard usage among photographers, and are familiar with the "terms of art" associated with the medium of photography. Congratulations on your advancement in skill, knowledge, and control of photographic techniques!

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.

Peter Glendinning,
Professor of
Art/Photography. MFA,
Syracuse University;
and, Mark Sullivan,
Associate Professor of
Composition. DMA,
University of Illinois at
Urbana-Champaign
