has successfully completed the online Specialization

Biostatistics in Public Health

In this Specialization, learners developed the ability to calculate key biostatistical measures used throughout public health, the biomedical sciences, and other scientific fields. They also learned to interpret the results from various statistical tests and to think critically about the application of statistical methods to specific research questions and data sets.

John McGready, PhD,
MS
Associate Scientist
Department of
Biostatistics

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
