

6 Courses

Introduction to Big Data

Big Data Modeling and Management Systems

Big Data Integration and Processing

Machine Learning With Big Data

Graph Analytics for Big Data

Big Data - Capstone Project

Feb 1, 2020

ASHWINI ANAND PATERIYA

has successfully completed the online Specialization

Big Data

You will gain an understanding of what insights big data can provide through hands-on experience with the tools and systems used by big data scientists and engineers. By following along with provided code, you will experience how one can perform predictive modeling and leverage graph analytics to model problems. This specialization will prepare you to ask the right questions about data, communicate effectively with data scientists, and do basic exploration of large, complex datasets. In the final Capstone Project, developed in partnership with data software company Splunk, you'll apply the skills you learned to do basic analyses of big data.

Ilkay Altintas, Chief Data
Science Officer
Amarnath Gupta,
Research Scientist
San Diego
Supercomputer Center

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
